

# WATER CONSUMPTION CONTROL

1- Poor quality materials  
should not be used in  
water transmission and  
distribution installations.

2- Water network  
should be kept under  
constant surveillance.

3- Leaky faucets and  
reservoirs must be  
repaired.

Erasmus+  
Enriching lives, opening minds.

4- Watering should not be done on rainy days.

Co-funded by  
the European Union

5- In order to prevent water loss caused by evaporation, garden or lawn irrigation works should be done after sunset.

6- The personnel on duty should be responsible for checking and closing the taps that are left open after the end of the working hours and cause water waste, and this issue should be followed up.

7- Employees and students should be made aware of the efficient use of water, and the supervisors of the institutions should encourage and inform the staff and students about saving.
